

The Math Support Center Video // Shooting and Uploading Your Video

SHOOTING YOUR VIDEO

Please shoot horizontally (**Landscape**), **Not Portrait**.

- Please keep your recording device stable, and not moving.
- Please shoot with your phone, DSLR camera, or computer camera at 24fps or 30fps -- avoid using Photo Booth, which tends to shoot at 15fps, making it visually incompatible with other formats.
- Please film near a natural light source, like a window if you're shooting during the day. If you shoot at night, try and have one, or two at most, light sources.
- Please record in the quietest location you can to achieve the best audio quality.

UPLOADING YOUR VIDEO

- **PREFERRED METHOD:** Please upload your video and fill out the form here:
<https://forms.gle/LUiARcb1qvHGrTD1A>
once uploaded, be sure to hit the [Submit] button!
- **ALTERNATIVE METHOD:** you can email a link to daniel.masciari@gmail.com by using WeTransfer (wetransfer.com)
